

ELECTRIC SERVICE TARIFF:

**MULTIPLE LOAD MANAGEMENT
SCHEDULE: "MLM-4"**

PAGE 1 of 3	EFFECTIVE DATE With Bills Rendered for the Billing Month of April, 2008	REVISION Original	PAGE NO. 5.40
-----------------------	---	-----------------------------	-------------------------

AVAILABILITY:

This tariff is available throughout the Company's service area from existing lines of adequate capacity.

Available to customers served by the Company with two (2) or more existing premises provided that each premises must have at least 1,000 kW metered demand or greater in at least one (1) month out of twelve (12). This tariff is not available to any pooling or other purchasing arrangement in which entities that would otherwise be individual customers aggregate their electricity purchases through any other customer.

APPLICABILITY:

To all electric service for Commercial and Industrial customers. Premises may have service points at different standard voltages. The customer must meet all qualifications and restrictions of service under the contract for electric service. MLM can be used as the standard bill calculation in conjunction with Real Time Pricing (RTP). A customer may have MLM accounts with RTP and MLM accounts without RTP. A customer's RTP accounts can not be combined with the customer's non-RTP accounts for purposes of calculating the coincident peak billing demands.

TYPE OF SERVICE:

Service shall be three phase, 60 hertz, at a standard voltage.

MONTHLY RATE:

Administrative Charge per non-RTP Metered Service Point \$85.00

Energy Charges:

June through September:

On-Peak kWh@ 8.6725¢ per kWh
 Shoulder kWh@ 3.8534¢ per kWh
 Off-Peak kWh@ 1.3509¢ per kWh

October through May:

All kWh@1.3509¢ per kWh

Demand Charges:

June through September:

	<u>Transmission</u> <u>Service</u>	<u>Primary</u> <u>Distribution</u>	<u>Secondary</u> <u>Distribution</u>
On-Peak kW	\$13.62.....	\$14.52	\$16.22 per kW
Economy kW	\$3.98.....	\$4.80	\$6.64 per kW

October through May:

Maximum kW \$3.98..... \$4.80\$6.64 per kW

Minimum Monthly Bill per Metered Service Point: \$2870.000 plus Environmental Compliance Cost Recovery plus Fuel Cost Recovery, as applied to the current month kWh, plus Franchise Fee

SCHEDULE: "MLM-4"

2 of 3	With Bills Rendered for the Billing Month of April, 2008	Original	5.40

DETERMINATION OF REACTIVE DEMAND:

Where there is an indication of a power factor of less than Ninety-Five percent (95%) lagging, the Company may at its option, install metering equipment to measure Reactive Demand. The Reactive Demand shall be the highest 30-minute kVAR measurement during the month for each of the customer's separate metered service points. The Excess Reactive Demand shall be kVAR which is in excess of one-third of the measured actual kW in the current month for each of the customer's metered service points. Each month the Company will bill excess kVAR at the rate of \$0.27 per excess kVAR.

ENVIRONMENTAL COMPLIANCE COST RECOVERY:

The amount calculated at the above rate will be increased under the provisions of the Company's effective Environmental Compliance Cost Recovery Schedule, including any applicable adjustments.

FUEL COST RECOVERY:

The amount calculated at the above rate will be increased under the provisions of the Company's effective Fuel Cost Recovery Schedule, including any applicable adjustments.

FRANCHISE FEE:

The bill calculated under this tariff will be increased under the provisions of the Company's Franchise Fee Schedule, including any applicable adjustments.

ACCESS CHARGE:

The access charge will be calculated for each individual metered service point comprising the customer's MLM group at which the customer receives electric service from the Company. The access charge will be based on the previous calendar year's load data before joining MLM, adjusted as necessary to represent the typical electrical consumption patterns. The access charge calculation will be based on the previous year's load data using each of the individual metered service point's historical demand and energy billing determinants as defined by the previous rate and the MLM rate. The monthly access charge will be one-twelfth (1/12) of the annual dollar difference between the previous tariff's base bill and this tariff's base bill for energy and demand at the Primary Distribution demand rates. This access charge calculation will be based on the previous year's load data using the individual metered service point's historical demand and energy stand alone billing determinants as defined by the previous rate's, and the MLM rate's, time periods. For accounts on RTP with MLM, the access charge will be based on the dollar difference in applying the customer's Standard Rate to the Customer Baseline Load (CBL) and applying the MLM demand and energy charges as described above to the CBL. The access charge is subject to recalculation when there is a rate change. The Company will bill the access charge on a monthly basis.

BILL DETERMINATION:

In addition to the monthly access charge and administrative charge, a monthly bill will be calculated based upon each metered service point's contribution to the totalized current month's usage of all the customer's metered service points contracted for service under this tariff at the demand and energy prices listed above.

ON-PEAK:

The On-Peak period is defined as the hours starting at 2:00 p.m. and ending at 7:00 p.m. Monday through Friday for the calendar months of June through September (Summer Months). The above hours on days in which the following holidays are observed shall be considered Off-Peak: Independence Day and Labor Day.

SCHEDULE: "MLM-4"

PAGE	EFFECTIVE DATE	REVISION	PAGE NO.

SHOULDER:

The Shoulder period is defined as the hours between 12:00 noon and 2:00 p.m. and between 7:00 p.m. and 9:00 p.m. Monday through Friday for the calendar months of June through September (Summer Months). The above hours on days in which the following holidays are observed shall be considered Off-Peak: Independence Day and Labor Day.

OFF-PEAK:

The Off-Peak period is defined as all hours not included above in the on-peak and shoulder periods, including all weekends and the calendar months of October through May (Winter Months).

DETERMINATION OF DEMAND:

June through September:

On-Peak kW: On-Peak kW shall be determined from the highest totalized 30-minute kW measurement during the On-Peak Period, as defined above, for the current month from all of the customer's metered service points.

Economy kW: Economy kW shall be determined from the highest totalized 30-minute kW measurement during all hours of the current month from all of the customer's metered service points minus the totalized On-Peak kW of the current month from all of the customer's metered service points.

October through May:

Maximum kW: Maximum kW shall be determined from the highest totalized 30-minute kW measured during the current month from all of the customer's metered service points.

TERM OF CONTRACT:

Five (5) years.

GENERAL TERMS & CONDITIONS:

The bill calculated under this tariff is subject to change in such an amount as may be approved and/or amended by the Georgia Public Service Commission under the provisions of applicable riders and other schedules.

Service hereunder subject to Rules and Regulations for Electric Service on file with the Georgia Public Service Commission.
